

# MEASURING AND TAPING

## Step By Step Instructions

### Getting Started:

To begin the Ralph Lauren Fabric Techniques, you will need to divide your room into equal increments. Follow these instructions for the Denim, Chambray and Linen Techniques.

### Measure:

- Measure the width of your walls and divide into equal sized sections. We recommend each panel be approximately 42" wide. The exact measurement will depend upon the length of your walls.
- Use a level and pencil to draw even lines from top to bottom of the wall. Lay down 2" Painter's Masking Tape along the edge of the line. Make sure to keep the tape straight.

### Tape:

- Press firmly on the tape to secure the edges.
- After completing each section, remove tape while glaze is still wet.
- Allow first sections to dry for 24 hours.
- To tape second section, place the tape on the dried glaze with the edge ending exactly where the dried glaze ends.
